## WHO Chemical Risk Assessment Network Institution Profile

PARMA, ITALY / 20-22 June 2017

# Toxicological Risk Assessment Center University of Belgrade – Faculty of Pharmacy

Belgrade, Serbia

Prof. Biljana Antonijevic, Ph.D.

### Institution Mission:

Toxicological Risk Assessment Center (TRAC) at the Faculty of Pharmacy, University of Belgrade was established in 2013, and is a unique institution of its kind in the Republic of Serbia. The main general goals of the Centre are research, training and development through networking and coordinating academia and other professionals, governmental and non-governmental organizations dealing with chemical safety. The principal research interest includes mechanisms of action, the effects of single and combined exposure and risk assessment of environmental pollutants. The mission of the TRAC is to increase the knowledge on toxic chemicals and to promote the implementation of national regulations on chemical safety harmonized with EU policy and standards through seminars, workshops and consultancy.

### Potential Areas for Collaboration:

- Activities on evaluation and implementation of toxicological risk assessment training programs
- Mixture toxicology and data analysis
- Food safety

### Work Undertaken and Topics of Interest

- Combined Exposures
- Mode of Action
- Food Safety
- Training
- Pesticides
- Toxic Metals
- POPs Chemicals
- Endocrine Disruption
